Article Review - DEM

Title of Article:
*

Originality
(Does the article present relevant information for its area of research?
Does the article introduce an idea that appears promising or might stimulate others to develop promising alternatives?)*

poor

Relevance
(Is the subject of this paper suitable for publication in the DEM?
Does the work address a significant problem?)*

poor

Title
(Does the title of this paper sufficiently clearly reflect its contents?)*

poor

Presentation
(Does the article have a logic structure?
Is the article clearly written?)*

poor

Abstract
(Does the abstract describe the research and the results?
Does the abstract provide a good perspective on the final message of the article?)*

poor

Introduction
(Does the introduction specify the research objectives?
Does the introduction present the article contribution to econometric theory and/or aspects of the practice?)*

poor

Methodology
(Are the methods used clearly explained?
Does the author use methods appropriate to the goals?)*

poor

Results
(Are the results clearly presented?
Are all relevant connections with others' work/research declared?)*

poor

Conclusions
(Are the conclusions correctly/logically explained?)*

poor

References
(Do the references reflect the latest work/research in the considered area?
Are the references correctly indicated in the article?) *

poor

Tables
(Are the data presented in tables correctly valued and interpreted in the article?
Are the tables correctly named and numbered?)

poor

Figures and graphs
(Do the graphs and figures properly illustrate the discussed subject?)

poor
Overall rating
*

poor

Final Decision
*

rejected
